DETAILED ACTION

This is the **Final Office Action** for application number 10/774,036 Recreational Vehicle Awning Hook Hanger, filed on 2/6/04. Claims 5-9 are pending. This **Final Office Action** is in response to applicant's reply dated 1/3/06. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated any new ground(s) of rejection presented in this Office action.

Claim Objections

Claim 5 is objected to because of the following informalities:

Claim 5 contains a colon after "and :" in line 5 and this should be changed to a semi-colon.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites, "wherein said tubular body...has a circumference suitable for insertion into an awning roller rail or other suitable apparatuses, without passing through said awning roller rail channel".

It is unclear how the circumference can be suitable for another suitable apparatus such as a curtain rod hanger and still meet the limitation of not passing through the awning roller rail channel. The claim is indefinite.

Also, there is a lack of antecedent basis for the "awning roller rail channel".

Claim 7 recites the limitation "the width and the length". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

Claims 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 4856744 to Frankel.

The patent to Frankel discloses a resilient and plastic (See Abstract for material) device (10) having a body (127, 129, 130) of J-shaped configuration having a first end including a U-shaped cradle (126, 128) for receiving objects thereon and a tubular body (120) having a substantially circular cross-section fixedly and horizontally mounted to the first end of the J-shaped body, the circumference of the circular cross section being suitable for insertion into a suitable apparatus, without passing through the suitable apparatus. Frankel also discloses wherein the width of the J-shaped body (127, 129, 130) is substantially equivalent to the length of the tubular body.

Response to Arguments

Applicant's arguments with respect to claims 5-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
